

Can a Robot be Human?

33 Perplexing Philosophy Puzzles

Peter Cave

978-1-85168-531-8 ○ Paperback original
27 September 2007 ○ RRP £7.99/\$12.95

**How unique are you? What does it really mean to be in love?
Can a murderer be innocent? And what is the difference
between a saint, a sinner, and a suicide bomber?**

In *Can a Robot be Human?*, Peter Cave introduces some of life's most important questions with tales and tall stories, jokes and arguments, common sense and bizarre conclusions. From how to get to heaven, to speedy tortoises, here are some of the most mind-bending problems in subjects like logic, ethics, art, and politics – and some tips on how to solve them!

Illustrated with quirky cartoons throughout, *Can a Robot be Human?* takes the reader on a taster tour of the most interesting and delightful parts of philosophy. For everyone who puzzles about the world.

"Peter Cave's lively new book is full of arresting ideas, brow-creasing conundrums, persistent puzzles, and pleasing paradoxes. It is ideal reading for open and inquiring minds from 12 to 112-- in fact for everybody who is just dipping a toe into philosophy for the first time. If it doesn't make you think, you are probably dead already." Professor Timothy Chappell, Department of Philosophy, The Open University

Author: Peter Cave teaches Philosophy at City University, London. He writes for *Philosophy Now*, has written and presented philosophy programmes for BBC Radio 4 and has lectured around the world.
